18. Choose “**Connect directly (cloud-services)**”.

 Adding connection...

SharePoint
Microsoft

SharePoint helps organizations share and collaborate with colleagues, partners, and customers. You can connect to SharePoint Online or to an on-premises SharePoint 2013 or 2016 farm using the On-Premises Data Gateway to manage documents and list items.

How do you want to connect to your data?

☒ Connect directly (cloud-services)

☐ Connect using on-premises data gateway ?

Cancel

Create

19. This will open pop up – sign in in that pop up.

20. Go back to the previous screen and choose the connection and click on **"Save"**.

Import setup

Setup

Select during import

The package creator chose this setup. You can make changes to the import here.

The connection or custom API already exists in the environment and must be selected when this package is imported.
